

## Natural disasters are followed by an increase in willingness to help other people

Namely, if a risk is perceived as caused by nature, people tend to focus on the consequences of a disaster, and they show higher preferences toward helping behaviours (Bohm & Pfister, 2000). This is in line with previous studies that demonstrated that natural hazards are often followed by altruistic emotions and willingness to help other people (Nerb & Spada, 2001).

Note: See source document for full reference.

## Applicable to:

Stakeholders: Norms/values, Attitudes toward environmental issues

Disaster Phases: Response, Recovery

Types of Actors Concerned: Non-active citizens

Hazards: Natural hazards

## **Recommendations:**

• Foster the adoption of a culture of disaster prevention and resilience by informing and motivating citizens to take action
