

Gendered differences in disaster preparedness

There were no statistically significant differences between female and male responses to all questions related to disaster preparedness, or to previous experience with disasters (responses to Q1.3 and Q1.4 - see source document for full description and reference), as well as between responses by different age groups.

Applicable to:

Stakeholders: [Gender roles](#), [Age-related roles](#)

Disaster Phases: [Preparedness](#)

Types of Actors Concerned: [National civil protection body](#), [Local authorities](#)

Hazards: [Natural hazards](#), [Man-made non-intentional hazards or emergency situations](#), [Man-made intentional hazards](#)
