

Caution in implementing untested measures

Benadusi (for literature reference see original source document) outlines several arguments of caution against developing a culture of resilience, focused on the use of untested projects, a shift of responsibility of disaster management onto citizens and the over-use of buzzwords such as “resilience”.

Note: See source document for full reference.

Applicable to:

Stakeholders: [Norms/values](#), [Rule of law](#), [Power relations](#)

Disaster Phases: [Preparedness](#)

Types of Actors Concerned: [National civil protection body](#), [Local authorities](#), [Non-active citizens](#), [Active citizens](#), [Government](#), [Healthcare and emergency services](#), [European Civil Protection Mechanism](#), [UN and other international organisations](#)

Hazards: [Natural hazards](#), [Man-made non-intentional hazards or emergency situations](#), [Man-made intentional hazards](#)

Recommendations:

- [Develop a personal "culture of preparedness"](#)
