

Influence of education and location on volunteering behaviour

People with higher education level and higher incomes are the most likely to volunteer, so are women and people with higher occupational status. People in large urban areas were less likely to volunteer than people in rural areas.

Applicable to:

Stakeholders: [Gender roles](#), [Age-related roles](#), [Socio-economic status](#)

Disaster Phases: [Response](#), [Recovery](#)

Types of Actors Concerned: [Active citizens](#), [Non-active citizens](#)

Hazards: [Natural hazards](#), [Man-made non-intentional hazards or emergency situations](#), [Man-made intentional hazards](#)

Recommendations:

- [Foster the adoption of a culture of disaster prevention and resilience by informing and motivating citizens to take action](#)
