

Personal data management in disaster situations

The nature of disaster management makes it inevitable to process personal data, either involving the public, disaster victims and/or the disaster management personnel and volunteers. Data processing here could range from processing manual files such as recording names of refugees at the border crossing to in-house IT-systems or cloud deployments, to apps that notify the public of disaster incidents or forecast.

Applicable to:

Stakeholders: [Rule of law](#)

Disaster Phases: [Prevention](#), [Preparedness](#), [Response](#), [Recovery](#), [All disaster phases](#)

Types of Actors Concerned: [Non-active citizens](#), [National civil protection body](#)

Hazards: [Natural hazards](#), [Man-made non-intentional hazards or emergency situations](#), [Man-made intentional hazards](#)
