

The CBDM approach during the capacity development stage

During the capacity development stage, a CBDM (Community-based disaster management) approach emphasises the importance of building networks and links with local as well as government agencies, to enable rapid decision-making and ensure clarity of roles in advance, for example. This community social capital, in turn, builds trust amongst all stakeholders.

Note: See source document for full reference.

Applicable to:

Stakeholders: [Communication](#), [Social networks](#)

Disaster Phases: [Preparedness](#)

Types of Actors Concerned: [Local authorities](#), [Government](#)

Hazards: [Natural hazards](#), [Man-made non-intentional hazards or emergency situations](#), [Man-made intentional hazards](#)

Recommendations:

- [Improve disaster management processes through better networking and cooperation between public and private actors and a better understanding of the role which each of these actors plays in the different disaster management stages](#)
